Preparing Teachers for a Changing World Linda Darling-Hammond,John

Bransford, 2012-07-12 Based on rapid advances in what is known about how people learn and how to teach effectively, this important book examines the core concepts and central pedagogies that should be at the heart of any teacher education program. Stemming from the results of a commission sponsored by the National Academy of Education, *Preparing Teachers for a Changing World* recommends the creation of an informed teacher education curriculum with the common elements that represent state-of-the-art standards for the profession. Written for teacher educators in both traditional and alternative programs, university and school system leaders, teachers, staff development professionals, researchers, and educational policymakers, the book addresses the key foundational knowledge for teaching and discusses how to implement that knowledge within the classroom. *Preparing Teachers for a Changing World* recommends that, in addition to strong subject matter knowledge, all new teachers have a basic understanding of how people learn and develop, as well as how children acquire and use language, which is the currency of education. In addition, the book suggests that teaching professionals must be able to apply that knowledge in developing curriculum that attends to students' needs, the demands of the content, and the social purposes of education: in teaching specific subject matter to diverse students, in managing the classroom, assessing student performance, and using technology in the classroom.

The Emerald Handbook of Evidence-Informed Practice in Education Chris

Brown, Joel R. Malin, 2022-01-31 Generating understanding into how to more routinely foster evidence-informed teaching practice globally, this groundbreaking handbook is vital reading for educational researchers, and especially those working close to practice, in all settings.

Gender-Responsive Governance in Sierra Leone John Idriss Lahai, 2023-07-28 This book investigates gender equality and women's empowerment in Sierra Leone, focusing especially on women's interactions with the state and its development partners. In particular, it highlights women's increasing agency in acquiring knowledge, diffusing power, engaging in grassroots politics, and compelling the government to adopt more gender-responsive policies. Exploiting extensive fieldwork and original multidisciplinary research methods (including econometric and statistical models), the book first sets out the history and impact of inequality in Sierra Leone, and then goes on to shed light on the constructive and collaborative engagement of women and the state on a variety of local and external strategies for promoting gender equality. Drawing throughout on insights from across gender studies, sociology, anthropology, economics, and political science, the book highlights how women are succeeding in transforming marginality into agency in order to build a platform for influencing change. By qualifying and quantifying the challenges of gender inequality in Sierra Leone, and the progress that is being made, this book provides important insights that will be relevant to other fragile, post-conflict states within Africa. The book

will be of interest to students and researchers studying women and gender studies, African studies, economics, international development, sociology, and political science and international relations. It will also deepen policymakers' and practitioners' understanding of women's diverse trajectories and experiences, and how the typology of government affects the patterns of inequality and equality.

History of Education in Nigeria A. Babs Fafunwa, 2018-10-03 Originally published in 1974, a comprehensive history of Nigerian Education, from early times right through to the time of publication, had long been needed by all concerned with Education in Nigeria, students, teachers and educational administrators. No one was better qualified than Professor Fafunwa to provide such a book, and in doing so he gave due emphasis to the beginnings of Education in its three main stages of indigenous, Muslim and Christian Education. Nigerian Education had been considered all too often as a comparatively recent phenomenon, but this book points out from the start that 'Education is as old as Man himself in Africa' and that both Islam and Christianity were comparative newcomers in the field. A historical treatment of these three strands which have combined to make up the modern Educational system was vital to a clear understanding of what was needed for the future, and most of the first half of the book is concerned with these Educational beginnings. The imposing of a foreign colonial system on this framework did not always lead to a happy fusion of the systems, and the successes and the failures are examined in detail. There was no shortage of documentary evidence in the form of reports and statistics during the decades prior to publication, but this evidence was frequently scattered and inaccessible to the student, so that the author's careful selection of key evidence and reports, often drawn from his own personal experience, will be invaluable for

those wishing to trace the development of Education in Nigeria up to the early 1970s. A knowledge of the history and development of the Nigerian Education system, of the numerous and intensely varied personalities and beliefs which have combined and often conflicted to shape it, is indispensable to all students in colleges and universities studying to become teachers. It is this knowledge that Professor Fafunwa set out to provide, drawing on his wide experience as teacher writer and educationalist.

Contemporary Issues in African Sciences and Science Education Akwasi Asabere-Ameyaw,George Jerry Sefa Dei,Kolawole Raheem,2012 In this careful articulation of science, the editors provide an intellectual marriage of Indigenous science and science education in the African context as a way of revising schooling and education. They define science broadly to include both the science of the natural/physical/biological and the 'science of the social'. It is noted that the current policy direction of African education continues to be a subject of intense intellectual discussion. Science education is very much at the heart of much current debates about reforming

African schooling. Among the ways to counter-vision contemporary African education this book points to how we promote Indigenous science education to improve upon African science and technology development in general. The book also notes a long-standing push to re-examine local cultural resource knowings in order to appreciate and understand the nature, content and context of Indigenous knowledge science as a starting foundation for promoting African science and technology studies in general. It is argued that these interests and concerns are not mutually exclusive of each other but as a matter of fact interwoven and interdependent. The breadth of coverage of the collection reflect papers in science, Indigeneity, identity and knowledge production and the possibilities of creating a truly African-centred education. It is argued that such extensive coverage will engage and excite readers on the path of what has been termed 'African educational recovery'. While the book is careful in avoiding stale debates about the 'Eurocentricity of Western scientific knowledge' and the positing of 'Eurocentric science' as the only science worthy of engagement, it nonetheless caution against constructing a binary between Indigenous/local science and knowledges and Western 'scientific' knowledge. After all, Western scientific knowledge is itself a form of local knowledge, born out of a particular social and historical context. Engaging science in a more global context will bring to the fore critical questions of how we create spaces for the study of Indigenous science knowledge in our schools. How is Indigenous

science to be read, understood and theorized? And, how do educators gather/collect and interpret Indigenous science knowledges for the purposes of teaching young learners. These are critical questions for contemporary African education?
